

TORQUE ENERGY INC.

F51-101F2 - REPORT ON RESERVES DATA BY INDEPENDENT QUALIFIED RESERVES EVALUATOR OR AUDITOR

To the Board of Directors of Torque Energy Inc. (the “Company”):

1. We have evaluated the Company’s reserves data as at November 30, 2009. The reserves data are estimates of proved reserves and probable reserves and related future net revenue as at November 30, 2009, estimated using forecast prices and costs.
2. The reserve data are the responsibility of the Company’s management. Our responsibility is to express an opinion on the reserves data based on our evaluation. We carried out our evaluation in accordance with standards set out in the Canadian Oil and Gas Evaluation Handbook (the “COGE Handbook”) prepared jointly by the Society of Petroleum Evaluation Engineers (Calgary Chapter) and the Canadian Institute of Mining, Metallurgy & Petroleum (Petroleum Society).
3. Those standards require that we plan and perform an evaluation to obtain reasonable assurance as to whether the reserves data are free of material misstatement. An evaluation also includes assessing whether the reserves data are in accordance with principles and definitions presented in the COGE Handbook.
4. The following table sets forth the estimated future net revenue (before deduction of income taxes) attributed to proved plus probable reserves, estimated using forecast prices and costs and calculated using a discount rate of ten percent, included in the reserves data of the Company evaluated by us for the year ended November 30, 2009 and identifies the respective portions thereof that we have evaluated and reporting on to the Company’s Board of Directors:

Independent Qualified Reserves Evaluator	Description and Preparation Date of Evaluation Report	Location of Reserves	Net Present Value of Future Net Revenue (before income taxes, 10% Discount rate, million dollars)			
			Audited	Evaluated	Reviewed	Total
VON Resource Management Ltd.	March 24, 2010	Canada		18.5		18.5
Totals				18.5		18.5

5. In our opinion, the reserves data respectively evaluated by us have, in all material respects, been determined and are in accordance with the COGE Handbook.
6. We have no responsibility to update this evaluation for events and circumstances occurring after their respective preparation dates.
7. Because the reserves data are based on judgments regarding future events, actual results will vary and the variations may be material. However, any variations should be consistent with the fact that reserves are categorized according to the probability of their recovery.

Executed as to our report referred to above:

VON RESOUCÉ MANAGEMENT
